

There to Care

BUILDING A HEALTHY ARIZONA

The Arizona Hospital and Healthcare Association's Community Benefits Initiative

Welcome: Arizona's Hospitals Are There to Care

Did you know that Arizona's hospitals invest millions in non-billed/reduced fee clinics, health education programs and family support services to improve the overall health of their respective communities? They also provide charity care to the poor and underserved. It is central to Arizona's hospitals that these services are provided to everyone, regardless of any ability to pay.

There to Care: Building A Healthy Arizona, the Arizona Hospital and Healthcare Association's (AzHHA's) 2007 Community Benefits Initiative, quantifies and demonstrates these community contributions that go beyond traditional healthcare services.

In the coming weeks, and throughout 2008, AzHHA will e-mail you and your staff a series of brief stories that highlight these programs offered at hospitals throughout the state.

If you have any questions or wish to have others receive the electronic hospital community benefits stories, please contact AzHHA's Communications Department at 602-445-4300 or communications@azhha.org.

Thank you for your time.
