Toprol XL	50 mg	Daily			√							
Levaquin	500 mg	Daily for 7 days			√							

1) At every visit: Check box for each medication if continuing.
 2) At every visit: Cross out each medication if discontinuing.

This sample of a completed medication flow sheet provides a compact summary of the patient's complete drug therapy and history and allows medication reconciliation to be performed longitudinally across many patient visits to the ambulatory clinic. (The Joint Commission does not endorse any specific product.) **d/c**: discontinuing.
